

by **Steve Hammons**

from AmericanChronicle Website

What is claimed to be a transcript of a 1981 intelligence briefing to President Ronald Reagan about UFOs and extraterrestrial visitation to Earth was posted on the Web site Serpo.org on Oct. 30, 2007.

According to the moderator of the Web site and a related e-mail stream discussion list, the transcript is from a briefing Reagan received at Camp David, Maryland, between Friday and Sunday, March 6 and 8, 1981.

Those present reportedly included several advisors to the president, CIA Director William Casey and a CIA contract employee who worked within a group of "caretakers" safeguarding information and other resources regarding the UFO-ET issue.

The names of presidential advisors who are still living were redacted by the moderator during his preparation of the transcript for public consumption. Former Secretary of Defense Caspar Weinberger and advisor Michael Deaver are named.

The Web site and discussion moderator indicates that Defense Department and Defense Intelligence Agency (DIA) personnel provided him with this information to be released to the public as part of an acclimation effort. That is, as part of preparation of the American public for more disclosure about the UFO-ET situation.

The transcript information posted is reported to be only part of the briefings to Reagan on these subjects.

REAGAN IN THE LOOP

In the transcript, **Casey** begins the briefing.

"Mr. President, good morning. As we discussed in February, this briefing contains some very, very classified information. I am not sure, oh, well, I'm not going to make a decision on who you want in the room. That will be your decision, Mr. President."

"This will be a real tough one to follow since the briefing starts back, historically speaking, that is, and runs up to recent times. I believe we have prepared a good chronological order of events. I'm sure you, Mr. President, will have many questions," Casey reportedly stated.

After a discussion to determine who in the room had a "need to know," the proper security clearance or had not previously been briefed on the matter, Casey continued, according to the transcript.

"...as you will see Mr. President, this stuff is pretty high up on the food chain. We call it ATS or 'Above Top Secret.' This stuff has its own classification and markings. We have a special container, special printers and copiers for this stuff. Every word of this material is printed on special paper then placed inside special covers.'

"The caretakers have taken special efforts to protect all of this stuff from being released inadvertently or copied by some unauthorized person."

After further discussion about the information in the briefing, some advisors choose to leave the room.

<u>Casey</u> then turns the meeting over to "The Caretaker."

"Good morning, Mr. President. First of all, I would like to give you a bit of information on my background. But before that, please, Mr. President, if you have questions during this briefing, just interrupt me, sir."

"I have been employed by the CIA for the past 31 years. I started the caretaking status of this project in 1960. We have a special group of people whom we call 'Group 6,' that cares for all this information."

According to the transcript, Reagan was somewhat familiar with the topic, having previously received a one-hour briefing from Casey the previous January, and also had been exposed to other information, stating,

"Well, I knew a little about this subject before. Back in 1970. Nixon had all of the good stuff and wanted to share it with some of his friends. Nixon showed me some papers. Not sure about who authored them, but they ... huh ... well something about New Mexico and other places.'

"Nixon was pretty ... huh ... well, you know, fascinated with it. He showed me something, some kind of object or device that came from one of their craft. Something that was taken from the New Mexico crash site. I don't know if, well ... huh ... do we know what it was? I don't think we knew or maybe now, after 11 years, we might know."

After a short break, *The Caretaker* began the briefing.

"Mr. President, as was mentioned earlier, I must say, that this briefing has the highest classification within the U.S. government. I will start with a slide presentation. I have most of this briefing on the slides, but I also have an outline that I have passed out to each in attendance."

"The United States of America has been visited by extraterrestrial visitors since 1947. We have proof of that earth has been visited for many thousands of years by various races of extraterrestrial visitors." "Mr. President, I'll just refer to those visits as ETs. In July, 1947, a remarkable event occurred in New Mexico. During a storm, two ET spacecraft crashed southwest of Corona, New Mexico and one crashed near Datil, New Mexico. The U.S. Army eventually found both sites and recovered all of the debris and one live Alien. I'll refer to this live Alien as 'EBE 1."

"Mr. President, **EBE** means 'Extraterrestrial Biological Entity.' It was a code designated to this creature was not human and we had to decide on a term for it. So, scientists designated the creature as EBE

Reagan asked,

"Do we or did we have others? The number '1' would seem to indicate we had others."

The Caretaker responds,

"Yes, we had others."

"All the debris and EBEs recovered from the first crash site were taken to Roswell Army Air Field, Roswell, New Mexico. EBE was treated for some minor injuries and then taken to Los Alamos National Laboratories, which was the safest and most secure location in the world. Special accommodations were made for EBE. The debris was eventually transferred to Dayton, Ohio, home of the Air Force Foreign Technology Division." "The second crash site wasn't discovered until 1949 by some ranchers. There were no live Aliens at this site. All this debris went to Sandia Army Base in Albuquerque, New Mexico."

Reagan asks,

"OK, a question, regarding the first site, how many aliens were in the spaceship?"

"Five dead aliens and one alive. The bodies of the dead aliens were transported to Wright Field in Ohio and kept in a form of deep freeze. They were later transported to Los Alamos where special containers were made to keep the bodies from decaying." The Caretaker continues,

"There were four dead aliens in the second crash site. Those bodies were in an advanced state of decaying. They had been in the desert for the past two years. Animals and time got to those bodies. The remains were transported to Sandia Base and eventually onto Los Alamos."

"We determined both crashed spaceships were of similar design and the bodies of the aliens were all identical. They looked exactly the same height, weight and physical features. Here are the photographs of the aliens." "They don't have any similar characteristics of a human, with exception of there eyes, ears and a mouth. Their internal body organs are different, their eyes, ears and even breathing is different. Their blood wasn't red and their brain was entirely different from human."

"We could not classify any part of the aliens with humans. They had blood and skin, although considerably different than human skin. Their eyes had two different eyelids. Probably because their home planet was very bright." ... EBE stayed alive until 1952 when it died. We learned a great deal from EBE. Although EBE did not have voice organs like humans, it was able to communicate with an operation performed by military doctors. EBE was extremely intelligent. It learned English quickly, mainly by listening to the military personnel who were responsible for EBE's safety and care."

"EBE was housed in a special area at Los Alamos and Sandia Base. Although many different military doctors, scientists and a select number of civilians studied EBE, it never became upset or angry."

"EBE helped us learn from all the items found in the two crash sites. EBE showed us how some of the items worked, such as a communications device. It also showed us how various other devices worked."

"EBE did explain where he lives in the universe. We call this star system Zeta Reticuli, which is about 40 light-years from Earth. EBE's planet was within this star system." "It took the EBE spaceship nine of our months to travel the 40 light-years. Now, as you can see, that would mean the EBE spaceship traveled faster than the speed of light. But, this is where it gets really technical."

"Their spaceships can travel through a form of 'space tunnels' that gets them from point A to point B faster without having to travel at the speed of light. I cannot fully understand how they travel, but we have many top scientists who can understand their concept."

PRESIDENTS AND PROGRAMS

The Caretaker goes on to give Reagan a history of presidential involvement and some of the programs involved over the decades dealing with the UFO-ET situation.

"As to some history. The original project, started back in 1947, was called 'Project GLEEM.' This project contained volumes of documented information collected from the beginning of our investigation of UFOs and Identified Alien Craft, or 'IAC.'"

"The project was originally established in the early '50s by, first President <u>Truman</u> and then by order of President <u>Truman</u> and then by order of President Truman established a group of people to handle this project. The group was called Majority 12 or 'MJ-12."

"In 1966, the project's name was changed to 'Aquarius.' The project was funded by confidential funds appropriated within the intelligence community's budget. The recovery of these alien spacecraft led the United States on an extensive investigative program to determine whether these aliens posed a direct threat to our national security."

"As you might remember, Mr. President, our country openly investigated UFO sightings under projects Grudge, Sign and finally Blue Book."

"The United States felt relatively sure the aliens' exploration of Earth was non-aggressive and non-hostile. It was also established that the aliens' presence did not directly threaten the security of the United States."

"Secondly, the public was beginning to believe that UFOs were real. The NSC felt this public feeling could lead to a nationwide panic if we disclosed everything we knew about UFOs and alien visitation."

"When the Air Force officially closed 'Blue Book' in December 1969, Project Aquarius continued operation under control of NSC/MJ-12. The NSC felt investigation of UFO sightings and incidents had to continue in secrecy without any public knowledge." "The reasoning behind the decision was this: If the Air Force continued its investigation of UFOs, eventually some non-cleared and non-briefed Air Force or DOD civilian officials would obtain the facts behind Project Aquarius."

"Obviously, for operational security reasons, this could not be allowed. In order to continue the investigation of UFO sightings and incidents in secrecy, investigators from CIA/DCE and MJ-12 were assigned to military investigative units with orders to investigate all legitimate UFO/IAC sightings and incidents."

"These agents are presently operating at various locations throughout the U.S. and Canada. All reports are filtered either directly to MJ-12. These agents are collecting reports of UFO/IAC sightings and incidents occurring on or near sensitive

governmental installations." **Reagan** suggests a break. And then the meeting resumes.

> "In the 1976 MJ-12 report, it was estimated that the aliens' technology was many thousands of years ahead of ours. Our scientists speculated that until our technology develops to a level equal to the aliens, we cannot understand the large volume of scientific information we have gained from the aliens' craft. This advancement of our technology may take many hundreds of years.'

... Mr. President, time is very different on the Eben Planet, which, by the way, we call SERPO. Their day is approximately 40 hours. That is measured by the movement of their two suns. The solar system containing SERPO is a binary star system, or two suns, rather than one, like our solar system."

GOOD GUYS AND BAD GUYS

Picking up on an implication within a statement from Casey, Reagan asks,

"Are you telling me there are different races or species, as you said, visiting Earth at the same time?" "Can you tell me how many different species have visited us?" Reagan asks.

The Caretaker states,

"At least five." Reagan:

"Are they all friendly?"

An advisor who is not named in the transcript reportedly says, "Mr. President, that is a very difficult question to answer. There are many parameters that we follow to evaluate the threat. However, we have little intelligence on four of the five."

"We have plenty of intel on the Ebens ... gee ... they've given us everything we asked for! They have also helped us to understand the other four species. I'm afraid to say, Mr. President and please don't misunderstand my words, but we think one of the species is very hostile."

"We have captured one of these hostile aliens. This gets into some very, very sensitive areas, Mr. President. I strongly suggest we end this discussion and move on to any further questions you might have and then get back to this. I don't think we are

Reagan is clear about his position. "I'm the President of the United States. I should know if we are endangered by some threat from outer space. If you have something to say about a threat posed by this one species of aliens, then I want to hear it.

Casey explains. "Mr. President, we have intelligence that would indicate this one species of aliens have been killed."

prepared to provide you with accurate answers to your questions about the potentially hostile aliens at this time," Casey reportedly says. Reagan:

"OK, but expect this to be given to me as soon as possible. I want to know everything about these hostile creatures so I or I mean we should start forming policies on how to deal with them ... do we have operational war plans on this?"

Presidential advisor (name redacted): "Yes, Mr. President, we have war plans on all potential threats to our country."

The Caretaker explains further,

"We call the hostile aliens simply that, **HAV**, meaning *Hostile Alien Visitors*. MJ-12 placed that code on them back in the '50s."

Reagan asks, "You mean to say, these H-A-Vs have been visiting us and kidnapping our people since the '50s?"

Casey:

"Mr. President, we have some indication that they might have been doing this for some time. But we really have to consider all of the evidence, listed in our reports, and compare that to some of the open source information."

PUBLIC INFORMATION, DISINFORMATION

The Caretaker: "In order to protect all this information and the fact that the United States Government has evidence of our planet being visited by extraterrestrials, we developed over the years a very effective program to safeguard the information. We call it 'Project

DOVE.' It is a complex series of operations by our military intelligence agencies to disinform the public.' Reagan recalls stories from his days as a Hollywood actor.

"I always knew there was some form of cooperation between our government and the motion picture industry. I heard rumors over the years ... even during my acting days."

The Caretaker confirms this. "Well, Mr. President, the first cooperative venture was the movie, THE DAY THE EARTH STOOD STILL. That was a cooperative venture with the United States Air Force and the movie industry."

"That movie, CLOSE ENCOUNTERS, was that one of them? I guess no "Bonzo" movies were involved. (Transcript: "Loud laughter heard." Moderator's note in transcript: "Reagan played the character Professor Peter Boyd in the Sept 1951 movie, BEDTIME FOR BONZO where a chimpanzee named Bonzo was his costar.)

Regarding Reagan's question about CLOSE ENCOUNTERS, *The Caretaker* responds, "Yes, Mr. President, we provided the basic subject matter for that movie."

Reagan:

Reagan:

"Was it based on a real incident?" The Caretaker:

> "Mr. President, in 1964, we were able to have our very first controlled encounter with the Ebens. Let me first give you the background. EBE was a mechanic, not a scientist. He was still able to teach us some of the Eben language. Their language was very difficult for our linguists to learn because it consisted of tones, not words."

> "However, we were able to translate some basic words. EBE showed us their communications device that had three parts. Once assembled, the device sent out signals, something like our Morse code system, although there was a problem." "During the crash in 1947, one part of this communication system was broken. EBE was unable to repair it until our scientists found some items that could be used in place of the broken parts. Once the communication device was repaired, EBE sent our

> messages. We had to trust EBE as to the contents of those messages." "You can imagine what some of our military commanders thought of this. EBE could be sending out a distress call that could result in some invasion. But that, of course, never happened. EBE continued to send messages until his death. But once he died, then we were on our own. We were able to crudely operate the device. We sent several messages out over a six month period (1953). But we did not receive any return messages."

"Mr. President, EBE sent out six messages. One letting his home planet know that he was alive and his comrades were dead, another explaining the two crashes, the third was a request to be rescued, the fourth was a message suggesting a meeting between his leaders and our leaders. The last message suggested some form of an exchange program."

"Over a period of a few years, we could send and receive information. We finally received a startling message from the Ebens. They wanted to visit Earth, retrieve their spacemen bodies and meet with Earthlings." "They provided a time, date and location. We figure that the Ebens were continually visiting Earth and had probably mapped it. However, the date was about eight years in the future."

After discussion about how linguists and other communications experts were able to establish communications with the Ebens, and the years of effort involved, The Caretaker gets to a main point.

"Our military figured something was wrong and that maybe the Ebens were confusing Earth time with Eben time. After a long series of messages, it was determined the Ebens would land on Earth on Friday, April 24, 1964."

"Our government, specifically, MJ-12 met in secret to plan the event. Decisions were made, then changed many times. We had just about 25 months from the time we finally received their message of the date to prepare for their arrival. Several months into the planning, President Kennedy decided to approve a plan to exchange a special military team. The USAF was tasked as the lead agency." "The USAF officials picked special civilian scientists to assist in the planning and crew selection process was the hardest to accomplish. Several plans were suggested and then changed. It took months for the planners to

decide on the selection criteria for each team member. They decided that each member must be military, single, no children and a career member. They had to be trained in different skills." "Mr. President, a team of 12 men were selected."

"When it came time for the meeting, we were ready. The landing occurred in New Mexico. We had a hoax landing location just in case it was leaked. The landing occurred and we greeted the Ebens. However, a mix up

"Finally in 1965, the Ebens landed in Nevada and we exchanged 12 of our men for one of theirs." "Mr. President. Our team of 12 went to the Eben planet for 13 years. The original mission called for a 10-year stay, however, because of the strange time periods on their planet, the team stayed three additional years. Two died on the planet and two

happened. They were not prepared to accept our exchange personnel. Everything was placed on hold."

decided to stay. Reagan:

Casey:

"Mr. President, yes, the movie was similar to the real event, at least the last part of the movie."

"OK, this is just amazing! I can see, about that movie. The movie was based on a real event. I saw that movie. 12 men left, along with Richard Dreyfuss."

TRUTH, FICTION OR SOMETHING ELSE? This section of the alleged transcript of an intelligence briefing to Reagan can be read in full at 'Serpo Section'. The moderator has also provided additional background information on that Section.

He indicates that more similar releases may be coming as part of public acclimation activities. Is this transcript real or phony? Is it completely accurate, completely false or some combination of truth and deception? There is really no sure way for readers to know, at this point in time.

Like other information on Serpo about an alleged exchange program with ETs and all of the other reports out there about UFOs, it can be quite difficult to differentiate between fact and fiction.

However, sometimes truths can be told within fictional contexts. Fact-based fiction can provide good information and insight. Did Reagan and our other presidents receive these kinds of briefings? Do the circumstances described in the alleged transcript actually exist, or something similar to them? Again, who knows?

Yet, we know these things are possible. And, deep down, we may have gut instincts and intuition about the situation that may make us wonder if there is quite a bit of truth in this kind of information.

If we look deep inside our hearts and minds, and into the skies, maybe we will find some answers.
