The normal state of the average human body is in a state of consciousness known as Social Consciousness or "The Box" in which state the Chakras/Subtle Bodies are in a so-called "ground state" or "static", somewhat "stupefied" state. Whenever a person begins to contemplate thoughts and ideas that transcend the mundane, trivial ordinary consciousness, the chakras/subtle bodies begin to move away from a static state. Furthermore, when a person engages in concentration, meditation and/or focus on a challenging thought, idea or concept, it induces the chakras/subtle bodies to undergo a faster vibratory movement. Certain techniques, such as Yoga, Chi Kung & Tai Chi can accelerate this vibration or angular momentum even more, especially after prolonged practice. The CSB-TSA R-1KA System facilitates, accelerates and expedites the dynamics of the infrastructure of the human body, thus creating an Expansion of Consciousness by stimulation activation of the very energetic transducers(chakras) that facilitate and constitute CONSCIOUSNESS, since it is now known that the brain is NOT the locus of consciousness, but the computer that processes the data of consciousness. Persons that expand their consciousness--hence data base--eventually evolve their mental, intellectual & spiritual faculties making it possible to "get out of the Box" once and for all, and continue their chosen evolutionary & incarnational path unassailed by the intrusions of the rampant genetic & mind programming. Thus, a little help from Takyon Transform Teknology can accelerate the process ever more! Try it; you'll love it!
