

How to Create Your Piggy Bank

1. Download and print your piggy bank.
2. Carefully cut out the piggy bank, cutting on the thick black line.
Tip: If the child is under 5, we suggest an adult complete the cutting and gluing/taping steps.
3. Find a cereal box or food box that's no longer being used, unfold it so it's completely flat.
4. Place the piggy bank cut out on the flat box. Once you have it positioned, tape or glue the piggy bank down.
5. The fun part! Decorate your piggy bank with crayons, markers or stickers.
Tip: We suggest decorating the piggy bank before you cut it out, as it's easier to color.
6. Following the outline of the piggy bank, cut the box along the outline of the piggy bank.

7. To make the coin slot opening, slightly fold the center of the small rectangle and make the first cut. Then unfold and cut out the small rectangle.
Tip: Make the slot slightly larger than the rectangle so it's easier to put in coins.
8. Fold along all the dotted lines.
Tip: Since you're folding 2 layers, the paper and cardboard, use the edge of the table or a ruler on the underside of the edge you are folding to get perfectly straight lines.
9. Place glue or tape on all tabs. Then carefully fold the box together, gluing/taping the tabs to the inside of the piggy bank. If you use glue, wait for it to completely dry.

10. Collect coins and dollars to add to your piggy bank so you can purchase items from the FH Gift Catalog. You may decide to give a chicken or duck, tree seedlings or a watering can, storybooks or a bible.

Whatever gift you choose to give, it will bless a child and family in need.
