

### *A Story of Hope*

Amsal and his family live in Ethiopia, where drought and terrain made it difficult to find water -- and even that was usually polluted. Searching and collecting water often caused the children to miss school...and their health and education suffered. Then someone like you brought clean water to Amsal's community and transformed everything for his family. Now the entire community knows the life-changing impact of clean water!

### A LIFE-CHANGING GIFT

has been given

### IN YOUR HONOR

The gift of clean water can change everything for a family in poverty! Accessing clean water for drinking, cooking, bathing, and watering crops and animals allows communities to practice good health and hygiene and saves time otherwise spent walking to fetch water from miles away.
