

A Story of Hope

Omar was only a baby when his family fled to Bangladesh from Myanmar. Though he is normally a joyful and playful child, when he became sick with a high fever and other symptoms, his family didn't know what to do. Thankfully, his parents took him to an FH health clinic in the refugee camp, where he received medical care and treatment for his illness and his parents learned health and hygiene practices that can keep their family healthier in the future.

A LIFE-CHANGING GIFT has been given **IN YOUR HONOR**

This gift's impact extends far into the future as you provide life-changing resources where they are needed most, maximizing every dollar through matching grants that help your gift make the biggest difference.
