Questions overview

Question sorting

Question order (increasing) 

2. What is an API?

Answer	Count
<input checked="" type="checkbox"/> An interface that allows two computers, apps, or systems to talk to each other programmatically	 90% (114)
<input checked="" type="checkbox"/> A piece of code that performs job routines in software, like a cron job	 6% (8)
<input checked="" type="checkbox"/> A standard format for delivering sample apps	 1% (1)
<input checked="" type="checkbox"/> A code export bundled into a package that can be uploaded as an app	 2% (3)
Total	100% (126)

Correct: 114 Partially correct: 0 Incorrect: 12 Lowest score: 0.00pts Average score: 0.90pts
Highest score: 1.00pts

3. What is GitHub?

Answer	Count
<input checked="" type="checkbox"/> A hub for publishing, forking, and cloning mostly open-source projects on the web	 50% (63)
<input checked="" type="checkbox"/> A hosting location for software developers to showcase and sell their coding projects	 5% (6)
<input checked="" type="checkbox"/> A platform for interacting on software projects through an interface that allows users to check-in and check-out code, similar to SharePoint	 20% (25)
<input checked="" type="checkbox"/> A platform based on Git that where you can integrate multiple Git projects into one massive project	 25% (31)
Total	100% (125)

Correct: 63 Partially correct: 0 Incorrect: 62 Lowest score: 0.00pts Average score: 0.50pts
Highest score: 1.00pts

4. Which of the following is a characteristic of object-oriented programming?

Answer	Count
--------	-------

Answer	Count
✓ Defining a single chunk of code (e.g., class) that can be instantiated with different objects	 60% (73)
✗ Defining code (e.g., class) that takes as its input JSON objects	 8% (10)
✗ Code where getter/setter methods encapsulate objects from their classes	 22% (27)
✗ Code that contains subroutines that originate from objects and return output back to the origins	 10% (12)
	Total 100% (122)

Correct: 73 Partially correct: 0 Incorrect: 49 Lowest score: 0.00pts Average score: 0.60pts
Highest score: 1.00pts

5. What command would you use on the terminal or command prompt to see all contents in a directory?

Answer	Count
✓ "ls" or "dir"	 63% (76)
✗ "lst"	 15% (18)
✗ "view"	 7% (8)
✗ "lst -all"	 16% (19)
	Total 100% (121)

Correct: 76 Partially correct: 0 Incorrect: 45 Lowest score: 0.00pts Average score: 0.63pts
Highest score: 1.00pts

6. What is open-source documentation?

Answer	Count
✓ Anyone can usually fork, re-use, and contribute to the content	 70% (85)
✗ The documentation source is open and available for anyone to consult	 14% (17)
✗ The documentation lists the open source licenses for a product	 6% (7)
✗ The source of the documentation is based on open-source libraries	 10% (12)
	Total 100% (121)

Correct: 85 Partially correct: 0 Incorrect: 36 Lowest score: 0.00pts Average score: 0.70pts

Highest score: 1.00pts

7. What is continuous integration (in relation to docs)?

Answer	Count
✓ Triggering automatic builds from a server location usually based on a Git action	 59% (70)
✗ Integration of engineering teams in a persistent way with documentation projects	 29% (34)
✗ Automatic inclusion of remote code from a host server	 11% (13)
✗ Splicing of client and server code in a dynamic way upon distribution	 1% (1)
Total	100% (118)

Correct: 70 Partially correct: 0 Incorrect: 48 Lowest score: 0.00pts Average score: 0.59pts
Highest score: 1.00pts

8. What are some tools you can use to generate documentation from an OpenAPI specification document?

Answer	Count
✓ Redocly	 19% (22)
✗ SlateGen	 7% (8)
✗ REST Studio	 19% (22)
✗ SwaggleDoc	 56% (65)
Total	100% (117)

Correct: 22 Partially correct: 0 Incorrect: 95 Lowest score: 0.00pts Average score: 0.19pts
Highest score: 1.00pts

9. What's the difference between Swagger and OpenAPI?

Answer	Count
✓ Swagger refers to tooling for the OpenAPI spec, while the spec is a formal description language only	 38% (44)
✗ Swagger is one vendor's implementation of the OpenAPI spec, while the spec is the original implementation	 36% (42)
✗ Swagger refers to the output options for the OpenAPI spec, while the spec refers to the input options	 7% (8)

Answer	Count
<input checked="" type="checkbox"/> Swagger refers to the interactive documentation generated while OpenAPI refers to the type of API	19% (22)
Total	100% (116)

Correct: 44 Partially correct: 0 Incorrect: 72 Lowest score: 0.00pts Average score: 0.38pts
Highest score: 1.00pts

10. What's the difference between merge commits and rebasing in Git?

Answer	Count
<input checked="" type="checkbox"/> Merge commits fold in edits based on the real times, while rebasing rewinds the commit and places it on top the previous commit in a modified timeline	38% (43)
<input checked="" type="checkbox"/> Merge commits are commits that integrate snapshots back into origin, whereas rebasing pulls snapshots from origin into each copy	35% (40)
<input checked="" type="checkbox"/> Merge commits are commits from users who have cloned origin, while rebasing is a commit from users who have not cloned origin	15% (17)
<input checked="" type="checkbox"/> There's no such things merge commits versus rebasing. These terms are made up. The real terms are commits and basing.	12% (14)
Total	100% (114)

Correct: 43 Partially correct: 0 Incorrect: 71 Lowest score: 0.00pts Average score: 0.38pts
Highest score: 1.00pts

11. What is a build management system?

Answer	Count
<input checked="" type="checkbox"/> A tool engineers use to build code based on scripts that generate outputs often called artifacts	42% (48)
<input checked="" type="checkbox"/> A system where engineers upload the builds for their applications	16% (18)
<input checked="" type="checkbox"/> A tool that release management engineers use to note build outputs from various engineering projects, as a kind of ledger	35% (40)
<input checked="" type="checkbox"/> The code logic that static site generators use to generate out site builds	6% (7)
Total	100% (113)

Correct: 48 Partially correct: 0 Incorrect: 65 Lowest score: 0.00pts Average score: 0.42pts
Highest score: 1.00pts

12. What is a package manager?

Answer	Count
<input checked="" type="checkbox"/> A system for distributing code, tools, apps, plugins, etc., in a way that ensures the versions are compatible	 41% (46)
<input checked="" type="checkbox"/> A repository for browsing and selecting app bundles	 12% (14)
<input checked="" type="checkbox"/> A tool for configuring and distributing your app as a bundled package	 37% (42)
<input checked="" type="checkbox"/> A utility for optimizing and compressing your code as a small package	 10% (11)
Total	100% (113)

Correct: 46 Partially correct: 0 Incorrect: 67 Lowest score: 0.00pts Average score: 0.41pts
Highest score: 1.00pts

13. Where might you distribute an open-source sample app for a project?

Answer	Count
<input checked="" type="checkbox"/> GitHub	 84% (95)
<input checked="" type="checkbox"/> AWS S3	 4% (5)
<input checked="" type="checkbox"/> Your company's own web server	 9% (10)
<input checked="" type="checkbox"/> Heroku	 3% (3)
Total	100% (113)

Correct: 95 Partially correct: 0 Incorrect: 18 Lowest score: 0.00pts Average score: 0.84pts
Highest score: 1.00pts

14. What is a pull request?

Answer	Count
<input checked="" type="checkbox"/> A request to merge a change back into a cloned or forked repo	 56% (63)
<input checked="" type="checkbox"/> A request to make a copy of a repo	 26% (29)
<input checked="" type="checkbox"/> A request to fork a repo	 8% (9)
<input checked="" type="checkbox"/> A request to set up periodic pulls from a data source	 10% (11)

Answer	Count
Total 100% (112)	
Correct: 63 Partially correct: 0 Incorrect: 49 Lowest score: 0.00pts Average score: 0.56pts Highest score: 1.00pts	

15. How might you create code syntax highlighting?

Answer	Count
✓ Through a package such as rouge, Pygments, or Chroma coupled with a corresponding CSS stylesheet	 28% (31)
✗ Syntax highlighting is executed through built-in browser APIs that identify code via proper semantic tagging of the code	 23% (26)
✗ By incorporating a syntax highlighting CSS stylesheet into your project	 34% (38)
✗ By adding a syntax highlighting JavaScript package and calling it from your code samples	 15% (17)
Total 100% (112)	
Correct: 31 Partially correct: 0 Incorrect: 81 Lowest score: 0.00pts Average score: 0.28pts Highest score: 1.00pts	

16. Why would you use Postman?

Answer	Count
✓ Execute requests and get responses for REST API docs	 77% (86)
✗ Package up requests into an envelope to be processed by a SOAP API	 9% (10)
✗ Handle incoming traffic for requests and responses from an application	 10% (11)
✗ Execute calls at specific points on a timeline	 4% (5)
Total 100% (112)	
Correct: 86 Partially correct: 0 Incorrect: 26 Lowest score: 0.00pts Average score: 0.77pts Highest score: 1.00pts	

17. What is a callback?

Answer	Count
--------	-------

Answer	Count
✓ Functions passed as arguments -- often when a process finishes, the function is called	 40% (44)
✗ A recursive function that starts over each time it finishes, creating a loop	 12% (13)
✗ The packet of information returned to the caller after a routine finishes	 36% (39)
✗ A parameter that has a pointer referencing its value	 12% (13)
Total 100% (109)	

Correct: 44 Partially correct: 0 Incorrect: 65 Lowest score: 0.00pts Average score: 0.40pts
Highest score: 1.00pts

18. What details should you describe about parameters?

Answer	Count
✓ Data types, min-max, required/optional, examples	 83% (91)
✗ Order, sequence, positive/negative	 3% (3)
✗ Relationship, history, type, boolean	 7% (8)
✗ Appearance, callbacks, negatives, booleans	 6% (7)
Total 100% (109)	

Correct: 91 Partially correct: 0 Incorrect: 18 Lowest score: 0.00pts Average score: 0.83pts
Highest score: 1.00pts

19. What symbol is used to indicate merge conflicts in Git?

Answer	Count
✓ >>>>>	 56% (60)
✗ !?	 22% (24)
✗ ///	 7% (8)
✗ ***	 14% (15)
Total 100% (107)	

Correct: 60 Partially correct: 0 Incorrect: 47 Lowest score: 0.00pts Average score: 0.56pts

Highest score: 1.00pts

20. What's the difference between a native library API and a REST API?

Answer	Count
✓ Native library is a library you download and incorporate into your project; a REST API is called from the cloud and often delivers information (e.g., JSON) via HTTP	 50% (52)
✗ Native library is a library that ships with your software; REST API is a library that is added (optionally) later on to the "rest" of your code	 7% (7)
✗ Native library is a library that stores code in a specific language in the cloud; a REST API is programming code that is language agnostic and is coupled in with project code locally	 35% (36)
✗ Native libraries runs from the master server; REST APIs run on client servers	 9% (9)
	Total 100% (104)

Correct: 52 Partially correct: 0 Incorrect: 52 Lowest score: 0.00pts Average score: 0.50pts
Highest score: 1.00pts

21. What is reStructured Text?

Answer	Count
✓ A lightweight format similar to Markdown, also with no angle brackets	 58% (57)
✗ A text format that includes re-usable structures	 19% (19)
✗ A wiki syntax consisting of specific structures for each component type	 7% (7)
✗ A synonym for Markdown content used in document generators	 16% (16)
	Total 100% (99)

Correct: 57 Partially correct: 0 Incorrect: 42 Lowest score: 0.00pts Average score: 0.58pts
Highest score: 1.00pts

22. What are static site generators?

Answer	Count
✓ Tools that generate a website often from Markdown files through templates and other scripting	 48% (47)
✗ Tools that convert a dynamic site into a static one purely based on HTML rather than databases	 13% (13)

Answer	Count
✗ Tools that generate websites based on static typing of inputs	 7% (7)
✗ Tools that generate out HTML websites, usually based on XML formats	 31% (30)
	Total 100% (97)
Correct: 47 Partially correct: 0 Incorrect: 50 Lowest score: 0.00pts Average score: 0.48pts Highest score: 1.00pts	

23. What is Docs as Code?

Answer	Count
✓ Treating documentation like software developers treat code	 64% (61)
✗ Code that functions like documentation because it is written in a literate, readable way	 4% (4)
✗ Documentation interspersed as comments in code, unifying the domains of code and documentation that are typically seen as separate	 19% (18)
✗ Documentation that functions programmatically within the developer's code	 14% (13)
	Total 100% (96)
Correct: 61 Partially correct: 0 Incorrect: 35 Lowest score: 0.00pts Average score: 0.64pts Highest score: 1.00pts	

24. What is distributed VCS?

Answer	Count
✓ Version control system that can be stored in remote repositories and merged back in to the origin when updates have been made	 45% (42)
✗ A version control system that stores content in a centralized model where users check-in and check-out content	 18% (17)
✗ A version control system that distributes commit permissions to all users rather than limiting admin control to a single individual	 11% (10)
✗ A version control system based on distributed nodes controlled by a central origin	 27% (25)
	Total 100% (94)

Correct: 42 Partially correct: 0 Incorrect: 52 Lowest score: 0.00pts Average score: 0.45pts
Highest score: 1.00pts

25. What is the OpenAPI specification?

Answer	Count
✓ A standard for describing REST APIs. Formerly known as Swagger	 38% (35)
✗ An open-source specification standard that can be used when defining specifications	 32% (30)
✗ A document model for defining access to an API, including licensing and re-use permissions	 18% (17)
✗ A specification used for APIs that requires access to the API be open and fair for all users, regardless of their background or locale	 12% (11)
	Total 100% (93)

Correct: 35 Partially correct: 0 Incorrect: 58 Lowest score: 0.00pts Average score: 0.38pts
Highest score: 1.00pts

26. What are some common sections in web API reference documentation?

Answer	Count
✓ Description, parameters, methods, sample requests, sample responses, and schemas	 77% (69)
✗ Overview, CRUD operations, curl, and definitions	 10% (9)
✗ Short descriptions, long descriptions, inputs, returns, throws	 6% (5)
✗ Dependencies, parameters, status codes, troubleshooting	 8% (7)
	Total 100% (90)

Correct: 69 Partially correct: 0 Incorrect: 21 Lowest score: 0.00pts Average score: 0.77pts
Highest score: 1.00pts
