

Perth Day Walks

Welcome to your next adventure.
Here are a few details to help you get prepared...

Phone Coverage

There is patchy phone coverage while you are on the track. Like most remote rural places, Telstra offers the best chance at reception.

Looking after your feet

Footwear:

Footwear is very personal and we prefer people wear what feels comfortable. Walking shoes shouldn't be too tight, but your foot shouldn't slip around in them either. If you're buying new shoes, go shopping after a long walk so your feet are a bit swollen. The best places to buy walking boots/ shoes will have some sort of ramp that you can stomp up and down on and make sure there is no pressure on your toes and heels. Boots can provide ankle support and help keep the sand out. Some hiking boots can be quite heavy. These are great for cold weather alpine hiking but they do tend to tire your legs quicker and heat your feet. There are plenty of lightweight boots available which are great for most Australian conditions. You might prefer to wear sneakers on your walk. They do let in a lot of dirt though and tend to wear out quite quickly on the rough surfaces of a bush track. Sturdy sandals have proven to be a good substitute for shoes when feet have blistered, and for beach sections. You are welcome to bring two pairs and alternate. The main thing is to make sure you know your footwear well - try them out in a variety of terrains and do a few long walks (15 - 20km) in them before the walk. We cannot emphasise enough that you have well worn in shoes or boots, good socks, and first aid for the prevention and treatment of blisters.

Preventing blisters:

To prevent blister formation, we highly recommend using 'fixomull' or a similar tape on heels and toes where rubbing is likely to occur - ask for it at your pharmacy. Some walkers also wear two pairs of socks to prevent blisters forming - a thin inner pair and a thicker outer pair. Others swear by Hikerswool applied between toes and over pressure points. The principle of blister prevention is to transfer any friction, caused by the movement of your foot inside your shoe, onto the fixomull tape or the extra sock, rather than onto your skin. If you know that your feet have a tendency to blister in certain spots, tape them before you walk. We are happy to help you with this. If you feel any rubbing or a 'hot spot' whilst walking, the best thing to do is stop and do something about it. In all instances, prevention is better than cure. Blisters are very difficult to dress so that you are able to walk comfortably.

Treating blisters:

Blister treatments vary and you may have your favourites. The second skin variety seems good, though you will also need good tape to keep it in place. Second skin treatments often have a sterile gel pack that pads and protects the blister from further friction. They can also be used as a (more expensive) preventative measure. Blister Block or Compeed are examples of this type of dressing.

A thick moleskin type plaster is also good to carry for blister treatment. Holes can be cut into moleskin to fit around a blister and a plaster put on top of that. This way there is little pressure put on the blister itself.

Walking poles:

Walking poles are very popular these days - especially the lightweight aluminium shock absorbing type. They help to take some pressure off your knees going downhill and can help you get uphill too! However, if you have good knees and strong legs you may not need them. A lot has been published about the pros and cons of walking poles - we're sure you can get the full story from the net. If you do choose them it's worthwhile practicing how to use them correctly so you get their full advantage. Try to use your arms as much as possible - by placing the poles opposite arm to leg and applying pressure as you step forward. Find someone knowledgeable in the shop where you purchase them to give you some tips. We can always help you when on tour.

What to Pack

- Day-pack - with a thick waist strap to help take some weight off your shoulders. In wet weather, a waterproof cover or a bin bag to wrap your belongings in can be handy
- Shorts/long pants and shirts for walking - as many sets as you wish! Quick-dry material is best, especially for trousers. Don't wear jeans walking.
- Socks - whichever thickness you're comfortable walking in and as many pairs as you like
- Boots/shoes for walking (make sure you wear them in well - see note on footwear below)
- Windcheater or lightweight jumper for walking
- Waterproof jacket
- Sun protection - hat (secure fitting and/or with chin strap), sun cream, sun glasses
- Any preferred first aid supplies - such as your favourite blister treatment! (Your guide will carry a full first-aid kit)
- Water bottle/s or camelback - 2 to 3 litre capacity and put some in your car for your drive home
- A packed lunch

Optional items:

- Waterproof pants. Some people love them and some hate them - personally, we don't wear them but there have been times when we have wished for a pair!
- Fly net (especially for walks in warmer weather)
- Camera and charger/batteries
- Gaiters for snake bite protection are recommended unless you are wearing long pants and long socks. They're also good for keeping sand out of your shoes.
- Sock protectors (to keep sand out of your boots)
- Additional snacks - We provide morning tea but you may wish to pack some more snacks for the afternoon e.g. muesli bars, nuts, lollies etc
- Walking poles

We'll bake a cake to share and carry with us hot water, milk, tea and coffee for our morning break.

The Noongar season of Djilba, or first spring, is a transitional season. It can be very sunny but also days of scattered showers. The days are warming, average of 18 degrees but the mornings can still be cool. Perfect weather for walking!

Medical Restrictions

As we operate in remote areas, guests will need to bring all of their own personal medications on tour. Whilst our guides are qualified in remote area or wilderness first aid and carry satellite phones, we do not carry epi-pens, Ventolin or other emergency medications. If a person requires urgent medical attention whilst on tour, it may take several hours or more for emergency services to attend the scene and take you to a medical facility. Under certain circumstances your tour consultant may request a medical certificate of fitness before you are cleared to participate on the tour. If pre-existing medical issues that will affect your ability to complete the tour or have an impact on other guests experiences, are not disclosed prior to the departure, we reserve the right to remove you from the tour.

Emergency Contact on Tour

In the case of an emergency and family and friends are trying to get in contact with you and unable to reach you on your personal phone, please ask them to call the office on 1300 544 882. After hours or on the weekend there is an option on the voicemail which will direct them through to the duty managers personal mobile.

On tour in an emergency situation our guides will be carrying satellite phones.

Cancellation Policy

All our tours are guaranteed departures.

We hope that you do not need to cancel your booking. However, if you do, our cancellation fee, based on the notice given prior to the departure date, is:

- More than 12 weeks: \$50 administration fee
- 6 to 12 weeks: loss of deposit
- 4 to 6 weeks: 25% of full tour cost
- 2 to 4 weeks: 50% of full tour cost
- less than 2 weeks: 100% of full tour cost, no refund

We understand times are still uncertain as we ride the rollercoaster of state outbreaks. That's why we've introduced flexible cancellation terms so that if you're in a pickle, your adventure isn't. Please see our cancellation policy during covid restrictions here <https://www.inspirationoutdoors.com.au/covid-19/>

If you have any concerns about cancelling, please take out travel insurance covering this contingency. This policy will be adhered to despite the most compelling and compassionate circumstances.
